ERP ARCHITECTURE HEALTH AUDIT - EXECUTIVE REPORT

System Diagnostic & Remediation Blueprint

Profile: Other / custom system | Generated: 2026-10-27

90 /100

Status: HEALTHY

Your setup is in good shape. A few targeted improvements will help.

Architectural Sub-Scores

Data Consistency	75%
Process Bottlenecks	98%
Migration Readiness	98%
System Architecture	92%

QUANTIFIED FINANCIAL IMPACT

52 hrs
Monthly Lost to Manual Work

EUR 1,460
Monthly Labor Overhead

EUR 10,600
Annual Recoverable ROI

Prioritized Architectural Risks

[MED] Disconnected systems

Your core tools (bank, e-commerce, CRM, e-invoicing) aren't connected to each other.

Recommended Remediation Roadmap

Stage 1: Discovery & audit

Map your current data, processes, and integrations | Define the scope, modules, and success criteria

Stage 2: Odoo setup & configuration

Stand up Odoo and configure the modules you need | Apply localization: accounting, tax, and e-invoicing for your country

Stage 3: Set up your data

Import your products, customers, and opening balances | Replace spreadsheets with structured, validated records
